

PhD programme at Bharati Vidyapeeth (Deemed to be University), Interactive Research School for Health Affairs (IRSHA), Pune

- BVDU IRSHA offers PhD programme in the fields of biochemistry and biotechnology
- The candidate can work in the following areas of biomedical research
 - Mother and Child Health
 - Communicable or Infectious diseases
 - Non-communicable diseases (Cancer, Obesity, Diabetes, Osteoarthritis)
- A doctoral degree offers an excellent career in biomedical research. It involves a range of laboratory assays and scientific tests which helps in the diagnosis, treatment, and prevention of diseases

Objectives for our PhD programme.

- To prepare the students for designing and conducting health related research independently and establish the cause of various diseases or complications and provide crucial scientific information to medical professionals
- To develop competency in effective scientific communication among the students.
- To inculcate the spirit of 'good and ethical research' in the students.

The outcomes of the programme can be mentioned as:

- Through investigations and experiments on human tissue and fluid samples, carried out in high-tech laboratories, biomedical researchers contribute to create innovative therapies for disease treatments.
- PhD generated so far working in different capacities at different academic/research Institutions
